DARK ENERGY AND HUMAN CONSCIOUSNESS: HUMANITY S PATH TO FREEDOM

Balboa Press, United States, 2014. Paperback. Book Condition: New. 216 x 140 mm. Language: English . Brand New Book ***** Print on Demand *****.Nobody knows how life was first breathed into the first atom, molecule, or cell; all biologists can do is to suggest the most reasonable possibilities by analysing the oldest DNA available. Scientists postulate that life emerged from non-life via natural processes about 3.7 billion years ago. It then evolved (and continues to evolve) to higher levels of complexity based on mutation, natural selection, and time. In other words, scientists believe that life is purely a physical phenomenon. There are logical arguments, based on scientific concepts, suggesting that dark energy is a non-physical force that influences life and is the source of reason, intelligence, compassion, and love. If we acknowledge and nurture this non-physical (dark energy) aspect of our beings, it will bring balance to our minds and move us from selfishness to love, care, and compassion. Is this the path to freedom from selfishness, corruption, abuse of power, and greed; and consequently from poverty, starvation, conflict and war?.
