

Supernova Remnants and their X-Ray Emission

Filesize: 4.86 MB

Reviews

A fresh eBook with an all new standpoint. It is actually writter in simple words and phrases instead of difficult to understand. You wont sense monotony at at any moment of your own time (that's what catalogs are for relating to if you question me).

(Dr. Marcel Collins)

SUPERNOVA REMNANTS AND THEIR X-RAY EMISSION

To download **Supernova Remnants and their X-Ray Emission** eBook, make sure you access the button listed below and save the file or gain access to other information that are highly relevant to SUPERNOVA REMNANTS AND THEIR X-RAY EMISSION book.

Book Condition: New. Publisher/Verlag: Springer, Berlin | Proceedings of IAU Symposium No. 101, held in Venice, Italy, August 30-September 2, 1982 | IAU Symposium 101, Supernova Remnants and Their X-ray Emission, was held on the Island of San Giorgio, Venice, 30 August - 2 September 1982. It was co-sponsored by the National Research Council, Italy, the University of Padua, the Observatory of Padua, and the International Astronomical Union, and was hosted by the Cini Foundation. The contents of this volume show the wide range of disciplines that are involved in supernova remnant research. Many new results were presented, not only from the X-ray observations from the Einstein Observatory but also from observations at optical and radio wavelengths. This has led to the stimulation of theoretical work, much of which attempts to accommodate in a more unified way all of these observations. Research on supernova remnants of all ages was reported. Perhaps the most impressive part of all this work is the way in which observations at all wavelengths have extended well outside the Galaxy to other members of the Local Group and beyond. The Symposium was attended by scientists from 15 countries. Twenty five invited papers and sixty-eight shorter contributions were presented during the 4-day meeting. Thirty-three of these shorter contributions were presented in poster sessions. This volume contains almost all (89) of those contributions. They are followed by discussions which took place after each verbal presentation. Since the availability of the discussions was left to the individual contributors, they are not complete, but those contained in this volume convey some idea of the nature of the exchanges. | 'l. Young Supernova Remnants.- The Mass and Structure of the Remnant of Tycho's Supernova.- X-Ray Spectra of Young Supernova Remnants.- The High Energy X-Ray Spectra of Supernova Remnants.- Structural Changes in...
