For example, the Aurora borealis in the north and Aurora australis in the south as seen from polar regions, Super Nova a stellar explosion outshining the whole of galaxy, the Milky Way and the galaxy, which are all unimaginably and supremely beautiful. And more miraculous is the creation, the nature and the natural phenomena are mysterious. By considering the plant kingdom or animal kingdom, we see the life. But we do not know where from exactly that life comes and where exactly it goes. Some other phenomenon is the development of various species in the natural creation. Numerous scientists have strived to unravel that secret of creative phenomenon of such development and named it as the process of evolution. But how long will this evolutionary process go and what would be the final outcome of this process in the case of human evolutionary development? These baffling questions perplexed all intelligentsia of the world and some could envision those, but in distinct ways. The author gives a comprehensive outlook of these aspects and answers these questions with his own perception. What would be the decisive destiny of the humanity and consequently the world? The author, trusting the scientifically proven concept of evolutionary development and philosophically propounded concepts, amalgamates both and projects the emergence of newer human race interestingly. His view of the emergence of supreme human beings called Humano divinos is awe-inspiring. He further expounds about the dawn of Golden Age along with the commencement of the Era of Intelligence on this globe.
